ANANT YASH

Full Stack Developer

anantyashh21@gmail.com +91 9304892830 India GitHub LinkedIn

SUMMARY

Computer Science Engineering student skilled in Full Stack Development (React.js, Node.js, MongoDB) with strong fundamentals in DSA and DBMS. Passionate about building scalable, real-world solutions, actively engaged in hackathons and continuous learning (200 Days of Code).

EXPERIENCE

Software Engineering Intern, *Bluestock Fintech Ltd.* 05/2025 – 06/2025
- Developing transaction intelligence modules for fintech payment infrastructure handling high-volume digital transactions
- Designing analytics pipelines to detect anomalous pay- ment patterns and improve fraud monitoring

Software Engineering Intern, *Infosys Springboard* 08/2025 – 11/2025
- Built ML models for predictive analytics on financial datasets
- Improved capability for transaction risk detection using data-driven analysis

Full Stack Development Intern, *1m1b* 07/2025 – 08/2025
• Collaborated on social impact projects under the 1M1B initiative to address real-world community challenges.
• Developed leadership, teamwork, and digital innovation skills while contributing to scalable solutions

EDUCATION

B.Tech in Computer Science and Engineering, *Lovely Professional University* 07/2024 – 08/2028
Punjab , India

Minor in Computer Science and Engineering, *Indian Institute of Technology Guwahati* 06/2024 – 05/2026
Guwahati , India

SKILLS

Technical Skills
Deep Learning Predictive Analytics Python Java C/C++ C# PyTorch Pandas NumPy Keras Git Docker Unity Blender AutoCAD React js Notebook Arduino Raspberry Pi Oracle Cloud Node js Mongo Db Html CSS

Soft Skills
Problem Solving, Analytical Thinking, Critical Thinking, Team Collaboration, Communication, Adaptability, Time Management, Attention to Detail, Research Mindset, Continuous Learning

KEY ACHIEVEMENTS

Second Rank Holder in State (Ntse) Olympiad. 01/04/2023

PROJECTS

Hospital Management Information System (HMIS) – Capstone Project for IIT Guwahati.
• Developed a Hospital Management Information System to streamline patient records, appointments, and billing processes
• Implemented backend functionalities and database management to ensure efficient data handling and system reliability

DeepFake Forensic Analyzer (DFA)
• Developed a deepfake detection system using Python, CNN, and TensorFlow, leveraging OpenCV for image and video processing
• Applied feature extraction, model training, and evaluation techniques to improve detection accuracy and ensure reliable classification of manipulated content

Dynamic Load Balancer
• Designed and implemented a dynamic load balancer using socket programming to distribute client requests across servers based on real-time load
• Monitored system performance and applied load balancing algorithms to improve scalability, reduce response time, and enhance fault tolerance

Karo Pitch
• Developed a full-stack platform connecting startup founders with investors using React.js, Node.js, and MongoDB.
• Built and integrated RESTful APIs, enabling efficient user interaction, data management, and seamless pitching experience.

CERTIFICATIONS

- Oracle Certified Networking Profesional
- Oracle Generative AI Certified Professional
- Oracle Certified DevOps Professional
- Oracle Certified Cloudbase Professional
- Oracle Cloud Infrastructure Data Science Professional
